ABOUT PROGRESSIVE MINING & LOGISTICS

Driving Field Efficiency With Reliable Mining And Logistics Support.

Based in Yeboamina, Progressive Mining & Logistics supports industrial and project-based operations with a practical, safety-conscious, and results-driven approach. We understand that mining and haulage businesses need more than transport. They need timing, coordination, responsive communication, and field discipline that keeps operations moving.

Our services are designed for mining sites, quarry operations, contractors, infrastructure teams, and industrial clients seeking dependable support for material movement, operational logistics, and project delivery.

Experienced Site Coordination
Operational support structured around timelines, accountability, and clear execution flow.

Safety-Focused Delivery
Processes shaped by disciplined field conduct, PPE awareness, and practical compliance culture.

Reliable Turnaround
We prioritize timely dispatch, operational consistency, and reduced avoidable delays.

Ghana-Based Access
Local understanding, practical route awareness, and responsive communication for project teams.

CORE SERVICES

End-To-End Mining And Logistics Services Built For Real Operations.

We provide practical support solutions that help mining, industrial, and infrastructure projects move resources, equipment, and operations with greater confidence.

01

Mineral Haulage

Reliable movement of mined materials and industrial loads with structured scheduling and route planning.

Request Service →

02

Equipment Mobilization

Controlled movement and positioning support for heavy equipment, machinery, and project assets.

Request Service →

03

Site Support Services

Operational field support for mining, quarry, and industrial works requiring structured coordination.

Request Service →

04

Bulk Material Transport

Efficient transport support for aggregates, quarry products, and high-volume site materials.

Request Service →

05

Fleet & Dispatch Coordination

Organized dispatch oversight that improves truck flow, timing, and field communication.

Request Service →

06

Project Logistics Management

Logistics planning and execution support for projects that depend on consistent material and equipment movement.

WHY CHOOSE US

Built Around Safety, Timing, And Operational Discipline.

Safety-First Operations
We approach every job with field awareness, PPE discipline, and practical safety culture.

Reliable Delivery Timelines
We focus on consistency, responsiveness, and logistics planning that supports project deadlines.

Skilled Field Support
Our services align with the practical realities of industrial sites and active project environments.

Operational Efficiency
We help reduce avoidable delays by improving coordination between site needs and logistics execution.

INDUSTRIES WE SUPPORT

Flexible Support Across Mining, Industrial, And Infrastructure Environments.

Our service model is adaptable to different field realities, project sizes, and transport requirements.

Mining Sites
Support services for active mining operations requiring coordination, movement, and delivery discipline.

Quarry Operations
Material haulage and logistics support for extraction, loading, and distribution activities.

Construction Projects
Transport and site support for contractors and project teams with continuous material needs.

Industrial Supply Chains
Structured dispatch and delivery support for facilities requiring dependable load movement.

Infrastructure Works
Logistics support for road, civil, and utility-focused projects operating under strict timelines.

Bulk Distribution
Movement of aggregates and operational materials for businesses that depend on continuity and scale.

OPERATIONS IN ACTION

Selected Mining And Logistics Workflows That Reflect Our Capability.

All | Haulage | Mining Support | Equipment | Logistics

HAULAGE
Bulk Material Movement
Coordinated transport support for high-volume material delivery.

EQUIPMENT
Machinery Mobilization
Heavy equipment movement support for project readiness and deployment.

SUPPORT
Site Logistics Coordination
Dispatch and route planning aligned to field operations and deadlines.

SUPPORT
Field Operations Assistance
Practical support structure for active mining and industrial workspaces.

HAULAGE
Truck Flow Coordination
Improved dispatch timing and material delivery sequencing for projects.

HAULAGE
Operational Load Transport
Dependable support for industrial teams with continuous logistics needs.

SAFETY & COMPLIANCE

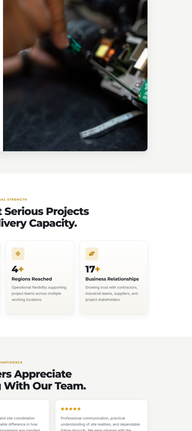

Safety, Discipline, And Operational Excellence Are Part Of The Job.

In mining and logistics environments, consistent execution depends on more than movement. It depends on awareness, communication, readiness, and disciplined field behavior. Our approach supports safer workflows and better project control.

PPE Awareness
We emphasize proper site readiness and practical field conduct around active operations.

Process Discipline
Execution is supported by communication, planning, and task coordination at every stage.

Risk-Conscious Support
We work with operational awareness that helps reduce avoidable disruptions and field errors.

OPERATIONAL STRENGTH

Built To Support Serious Projects With Real Delivery Capacity.

93+
Projects Supported
Mining, industrial, and logistics workflows handled with structured coordination.

589+
Dispatch Cycles Managed
Transport movements planned and supported for time-sensitive project environments.

4+
Regions Reached
Operational flexibility supporting project teams across multiple working locations.

17+
Business Relationships
Growing trust with contractors, industrial teams, suppliers, and project stakeholders.

CLIENT CONFIDENCE

What Partners Appreciate About Working With Our Team.

★★★★★
Progressive Mining & Logistics brought structure to our dispatch process and helped us maintain better timing on a demanding project schedule.
Michael A.
Project Supervisor

★★★★★
Their responsiveness and site coordination support made a noticeable difference in how smoothly our material movement was handled.
Esther K.
Procurement Lead

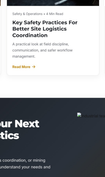

★★★★★
Professional communication, practical understanding of site realities, and dependable follow-through. We were pleased with the support.
Daniel O.
Operations Coordinator
