End-to-End — Assessment to maintenance

HOW IT WORKS

A clear path from energy need to working solar solution.

We make the process easy to understand so you know what happens before installation begins.

01 **Consultation**
Tell us what you want to power or the solar service you need.

02 **Site Assessment**
We assess the site and relevant energy or installation requirements.

03 **System Planning**
A suitable solution is planned around your requirement.

04 **Installation**
The system is installed, connected and prepared for use.

05 **Testing & Support**
We test the solution and remain available for maintenance support.

FREQUENTLY ASKED QUESTIONS

Questions before going solar?

Here are a few useful starting points. For system-specific questions, request an assessment and tell us what you need to power.

Still have a question?
Talk directly with Soulworld

How much does a solar installation cost?

The right price depends on what you need the system to power, your expected usage, the equipment required and the installation environment. A site and load assessment is the best place to start.

What solar system do I need for my house?

Do you install solar borehole systems?

Can you maintain a solar system you did not install?

How do I request a site assessment?

READY TO GET STARTED?

Tell us what you want to power.

Start with a quick conversation. We'll help you identify the next practical step for your home, business or project.
